

POWER TRANSMISSION APPARATUS FOR CLUTCHLESS COMPRESSOR

Inventor: SON, Eun Gi

Docket No. 2729-161

FIG. 1 (PRIOR ART)

Docket No. 2729-161

This exploded perspective view shows the assembly of the circular component. At the base is a multi-layered disc (20) with a central hole (21) and a flange (22). A central shaft (30) passes through the disc, with a central hub (31a) and a central nut (31b). A central cap (32) is positioned above the hub. A central ring (23) is shown below the disc. A central plate (40) is positioned above the disc, with a central hole (41) and a flange (42). A central cap (43) is positioned above the plate. A central ring (44) is positioned around the plate, with a central hole (45a) and a flange (45b). A central cap (46) is positioned above the ring. A central ring (44a) is positioned around the plate, with a central hole (44b) and a flange (44a). A central cap (44b) is positioned above the ring. A central ring (44c) is positioned around the plate, with a central hole (44d) and a flange (44c). A central cap (44d) is positioned above the ring.
